Final meeting in Pescara (Italy)

From Code to Countryside: We officially assembled, tested, and optimized our new e-learning platform to deliver a smoother digital learning experience. To balance the tech with tactile experience, we also headed out for a hands-on field trip to a farm, grounding our digital curriculum in real-world discovery.

e-Learning

Welcome to the Agricultural Literacy E-Learning Platform

This platform is designed to enhance the agricultural literacy of adults through the lens of Circular Economy and Digital Integration. Whether you are a farmer, an entrepreneur, or an adult learner, our multilingual resources (TR, RO, IT, EN) are here to support your journey.

What's Included in This Platform?

This platform is equipped with an Agricultural Literacy Curriculum, Digital Integration Modules, professional training videos, tutorial presentations, pre-tests, post-tests and evaluation survey. Follow the steps below to enhance your agricultural literacy skills and get your official certificate of participation.

Your Journey to Agri-Literacy

Follow these steps in order to complete your training and receive your certificate:

1. **Baseline Assessment (Pre-Test):** Take our short pre-test to gauge your current knowledge.
2. **Core Learning:** Build your theoretical foundation by reviewing the Agricultural Literacy Curriculum and Digital Integration Modules.
3. **Visual Training:** Reinforce your learning by browsing our PowerPoint presentations and watching our 7 specialized training videos.
4. **Final Assessment (Post-Test):** Test your knowledge.
5. **Evaluation & Certification:** Complete the E-learning Evaluation Survey. Once you have finished all previous steps and the survey, your Post-Test will be evaluated. Upon meeting the success criteria, your Certificate of Participation will be sent directly to your registered email address.

The Think AgriCircular E-Learning Platform Is Here!

We are excited to announce the launch of the new e-learning platform on Think AgriCircular! Designed to bring the principles of circular and sustainable agriculture directly to you, the platform features engaging, self-paced **learning modules** tailored for learners, educators, and agricultural practitioners. You can **test your knowledge** with interactive self-assessments, **discover practical tools** for eco-friendly farming, and **earn a certificate** upon completion.
