Gains Momentum at International Meeting in Romania

On August 28–29, 2025, the second international meeting of the project took place, hosted by InnoEdu in Sfântu Gheorghe, Romania

The first day was held at the StartUp HUB, where partners reviewed the excellent progress made on the project's first major output, the Agricultural Literacy Curriculum

The newly developed Agricultural Literacy Curriculum was put to the test in a series of workshops organized by each partner in Turkey, Italy, and Romania

Cooperative Farm Visit

Family Farm Visit

Beyond the Meeting Room: Farm Visits and Cultural Exchange

This provided an excellent opportunity to gain first-hand insights and compare different agricultural approaches in practice

BUILD SKILLS

Looking ahead, the meeting established clear plans for the next phase. The main focus will be on Work Package 3: Digital Skills. The draft curriculum for the digital training modules will be developed until May 2026

The project's website will be transformed into an online learning platform that offers self-evaluation and provides completion certificates. To share the project's results, each partner will host multiplier events in the spring of 2026

The two-day meeting was not only highly productive professionally but also full of memorable experiences.
